NEW from Samsung. When even the best Day/Night performance CCTV camera is not sufficient, the STC-14 can provide "high performance thermal night vision". Ideal for covert surveillance, Customs, Police, Dept of Defence etc.

It is a cost-effective and stable night vision camera equipped with a microbolometer thermal imaging sensor. Embedded with advanced infrared imaging technology, suitable for short and medium-range monitoring purposes and offers astoundingly sharp and finely detailed images with its high performance sensor and wide field of view.

Key points: Lightweight just 2.2Kgs, lighter than conventional thermal cameras • Ultra low thermal detection level down to just 0.08C degrees • Up to 360 meters detection range with zero lighting • Housed in a robust IP66 enclosure for outdoor use.

Panasonic SD5 Camera

■ Direct Alarm Supplies > +61 2 9717 5222

■ Email > info@das.com.au

■ Web > www.das.com.au

The new Panasonic SD5 cameras have reset the benchmark camera technology. The new cameras introduced to the SD5 range include the WV-CP500 series (full body camera) and WV-CW500 series (Vandal resistant domes) of cameras, both of which have class leading 650TVL, allowing for precise image quality. These cameras also combine 'Super Dynamic 5 technology' with adaptive black stretch, which results in an exceptional wide dynamic range, capturing the dark and bright areas of a scene.

The combined effects of all these great features along with Panasonic's superior reliability and quality make the new SD5 series of cameras a true standout and in a league of its own.

The new SD5 range is only available from Pacific Communications and Direct Alarm Supplies.

Hills™ Reliance VoiceNav

■ Direct Alarm Supplies > +61 2 9717 5222

■ Email > info@das.com.au

■ Web > www.das.com.au

Direct Alarm Supplies, a Hills company, launches its new modern and sleek designed security code pad in Australia and New Zealand - the Hills Reliance VoiceNav.

Packed with innovation, it is a revolution in security for residential to medium commercial customers wanting to protect their family, staff, property and assets.

The product was developed in Australia with its valued customers to address their needs for an aesthetic modern code pad with advanced security and communication features. The best in global talent helped engineer the perfect product for installers and end-users.

Consumer focus groups confirm that the range of easy to use features make the Hills Reliance VoiceNav the perfect security code pad that fulfills the needs of today and the future.

Powerful capabilities in a small package

Sagem Sécurité announces the new MA500+ series biometric terminals for access control and time and attendance applications.

MA 500+ offers value-added retailers and access control manufacturers a reliable, powerful and scalable solution.

The MA 500+ terminals offer the highest level of security on the market. Fast: 0.7 sec in authentication mode and 0.9 sec in 1:1000 identification mode (including detection, coding and matching).

Accurate: depending on the required level of security, the false acceptance rate or FAR can be configured down to 10⁻⁸. The highest database capacity on the market: up to 100,000 fingerprint templates with extended license. Wide area, accurate fingerprint sensor, for high definition fingerprint image acquisition.

MA500+ series

Magnetic releases High Door Barrier for entrance control

With a growing demand for "user friendly" foyer type pedestrian barriers, Magnetic Automation has released its revolutionary barrier the "Magnetic MPH High Door Pedestrian Barrier".

The MPH High Door Pedestrian Barrier is a user friendly access barrier developed for the fast processing of people in areas such as corporate entries, commercial buildings and public facilities.

Designed with style, intelligence and security in mind, the Magnetic MPH will offer the performance that has come to be expected from all of the Magnetic range of products. Magnetic offers the specialised expertise with entrance control systems, security is our industry.

For more information contact Magnetic Automation on 1300 364 864.

Powersmart Premium Protection

■ Natural Power Solutions Pty Ltd > +61 2 9906 6696

■ Email > sales@nps.com.au

■ Web > www.nps.com.au

Natural Power Solutions' Powersmart Premium PM10 provides protection against power surges caused by external sources, such as lightning strikes and electrical switching, as well as providing a measure of protection from surge events generated on the secondary side of the filter.

The PM10 is a 3-stage protection unit utilising primary and secondary MOV protection in conjunction with an L/C filter. In addition, the unit also provides filtering of line harmonics and high frequency.

The unit has a revolutionary design, making it lightweight, portable, easy to install (Plug & Play) yet suitable for industrial purposes due to its strong metal enclosure.

The Powersmart Premium PM10 has been designed in accordance with AS3100, AS1768, IEC61643-1, IEC61000-6-1, 2, 3, 4. The unit can be used in applications including Plug-in 10A UPS systems up to 3kVA, tower or rack mounted servers, portable instrumentation, security monitoring devices.
