GE Challenger Access Control Hi-O Interface

■ Direct Alarm Supplies > (02) 9717 5222

■ Email > info@das.com.au

■ Web > www.das.com.au

Hi-O technology brings a lower overall maintenance cost of door environments by providing advanced diagnostic information. Rather than waiting for a fault to occur, devices such as locks, readers and mechanical door openers can report specific information, predict that a fault is about to occur and send out system warnings via Challenger’s Forcefield management software. Examples of information that can be captured include: device cycle counters, high and low voltage signals, failure to lock messages & sabotage monitoring.

The TS0864 adds a single Hi-O door to an four-door controller and is polled as a RAS (Remote Arming Station). Up to 4 TS0864 can be connected to a single 4 Door controller. A 4-door controller can support up to 4 doors of any combination of conventional or Hi-O doors on its local LAN.

Contact Direct Alarm Supplies for further information.

Comelit – Planux Colour Intercom Kit

■ Security Merchants Australia Pty Ltd > 1300 663 904

■ Email > smvic@assaablo.com

■ Web > www.security-merchants.com

New from Comelit – Italy, a company with more than 50 years experience and commitment to innovation, come the ‘Planux’ Intercom Kits. Available in Single and Two Family versions and featuring a 3.5 inch colour LCD Screen with Handsfree operation, ‘Planux’ represents the perfect marriage of style and functionality. With ‘sensitivetouch’ technology, control keys are illuminated automatically when the monitor detects movement close by. Along with a host of optional colour templates and flush or desk mounting capabilities, with ‘Planux’ every living space takes on the personality of its owner. Privacy and Intercommunications functions are standard and kits can be expanded to include multiple Entrance Panels and 16 Internal Monitors. The ‘Planux’ Monitors are also suitable for use in the Comelit ‘SimpleBus’ 2- Wire system, capable of providing Door Intercom functionality for up to 240 Apartments.

UniGuard Robust Attendance Recorder

■ UniGuard Patrol Management Systems > (02) 9671 7777

■ Email > sales@uniguard.com.au

■ Web > www.uniguard.com.au

The UniGuard system has outstanding value for money, easy setup and zero maintenance. A security operator simply passes by and touches a small checkpoint to record beyond any doubt that they attended that area. Cannot be any simpler!

The UniGuard Robust Recorder will hold over 4,000 events in its non volatile memory, each event holds identification data, date and time accurate to the second. The wand comes with a high power lithium battery, guaranteed to last five years without recharging. It incorporates shock logging. This feature rates impacts to the recorder, storing time of the impact and intensity. The wand is fully watertight, microwave-oven proof and comes with a 25 month warranty.

RoboCam R1 body-worn camera system

■ ValuTronics Pty Ltd > (02) 9671 7777

■ Email > info@valutronics.com.au

■ Web > www.valutronics.com.au

RoboCam is a totally mobile security system comprising of a portable hard drive and headset with a custom made shoulder holster for user convenience. RoboCam is an essential asset for any professional security operative that wants to protect their livelihood. A false allegation could cost an operative their hard earned license and consequently their means to earn a living. RoboCam can ensure that this never happens to you.

Every RoboCam unit provides multi-level password protection and frame counters to guarantee that your data tamperproof. The hands free unit enables the user to have an instant record of everything they hear and see.

Videofied XL totally wireless security

■ Video Alarm Technologies > 1300 46 44 55

■ Email > office@videofied.com.au

■ Web > www.videofied.com.au

The new Videofied XL wireless video alarm system is completely UNPLUGGED and has two way voice built in, also accommodating up to 20 wireless devices including Videofied indoor and outdoor MotionViewers.

The VIDEOFIED™ MotionViewer combines a PIR, camera and illuminators into a self-powered device that can be instantly mounted anywhere security is needed. The panel communicates alarms to the Central Monitoring Station over the cell network using GSM (2-way voice) and GPRS (10 second video of the intrusion). Video verification and Voice Verification on a single system – all for a similar price as a blind burglar alarm makes the XL the next generation alarm system for the domestic to commercial markets.

The VIDEOFIED™ XL literally needs no wires or cables, not even power to the panel. Contact us for more information.
