

# Electronic Security Trainer

**ELECTRONIC  
SECURITY**

## Career level

## Job Description

As an Electronic Security Trainer, you will be responsible for designing, developing, and delivering training programs related to electronic security systems, including surveillance cameras, access control systems, alarms, and related technologies.

## On the Job

As an Electronic Security Trainer, the day-to-day job responsibilities include:

- Delivering comprehensive training programs on electronic security systems and technologies.
- Developing training materials, including manuals, presentations, and multimedia resources, to support the learning process.
- Conducting training sessions for individuals or groups, ensuring participants grasp the concepts and practical applications of electronic security systems.
- Teaching technical skills related to installation, configuration, maintenance, and troubleshooting of electronic security equipment.
- Providing guidance on industry best practices, standards, and regulations in electronic security.
- Demonstrating proper usage of tools, equipment, and software used in the field.
- Assessing trainees' progress and knowledge through evaluations, quizzes, and practical assessments.
- Offering continuous support and mentorship to trainees, addressing their questions and concerns.
- Staying updated on emerging trends and advancements in electronic security technology to enhance training programs.
- Collaborating with internal teams to identify training needs and customize programs accordingly.
- Maintaining training records and documentation for reference and compliance purposes.

## Salary & Benefits

Your starting salary can vary because of factors like level of experience, training, or location. Your salary as an Electronic Security Trainer may increase over time as you build skills, knowledge and experience.

**Weekly Pay:** \$1,300 – \$1,730

**Annual Pay:** \$70,000 – \$90,000

**Hours per week:** 38

**Hourly Pay:** \$35.00 – \$45.00

## Entry Qualifications & Training

Being part of the security industry requires an individual to undertake his/her responsibility with a high degree of professionalism.

The requirements to become an Electronic Security Trainer include:

- Complete a Certificate IV in Training and Assessment
- Have prior experience working in electronic security.

## Career Progression

With time and experience as an Electronic Security Trainer you can progress to a security consultant, security manager, systems integrator, security technology trainer or a Research and development role.

## Experience & Skills Required

Among the useful skills to highlight to your employer when applying for an Electronic Security Trainer role include:

- In-depth knowledge of electronic security systems and technologies, including surveillance cameras, access control systems, intrusion detection systems, and alarm systems.
- Strong understanding of emerging trends and advancements in electronic security, such as biometrics, artificial intelligence, and cybersecurity.
- Proficiency in programming and configuring electronic security systems to meet specific needs and requirements.
- Comprehensive understanding of relevant industry standards and regulations and data privacy laws.
- Excellent communication skills to effectively deliver training sessions and explain complex concepts to trainees with varying levels of technical expertise.
- Experience in developing training materials, including presentations, manuals, and hands-on exercises, to enhance learning and practical application of electronic security systems.
- Ability to conduct hands-on training sessions, including system installations, troubleshooting, and maintenance procedures.
- Strong analytical and problem-solving skills to identify and resolve technical issues during training sessions.
- Knowledge of instructional design principles to create engaging and interactive training programs.
- Experience in evaluating trainees' performance and providing constructive feedback for improvement.
- Familiarity with adult learning methodologies and the ability to adapt training approaches to different learning styles and needs.
