

Sustainability / Environment Courses

At the end of each module, you will be asked to undertake an online assessment to check your understanding of the key concepts presented.

Corporate Social Responsibility

About This Module

Our organisation believes that we need to take action to ensure the sustainable development of future generations. To support this belief, we are committed to being a leader in Corporate Social Responsibility (CSR).

This module has been designed to increase your awareness of how CSR affects both our organisation and you as an individual. It also aims to engage you in our CSR strategy and initiatives.

You should allow approximately 20 minutes to complete this module.

Environmental Awareness

About This Module

Our organisation is committed to protecting the environment. We have therefore designed this module to increase your awareness of the environmental issues our organisation faces. It will also provide you with strategies to help reduce our impact on the environment.

This module is divided into three units:

1. The Environment and Your Responsibilities
2. Environmental Impact
3. Reporting, Measuring and Monitoring

You should allow approximately 20 minutes to complete this module.

Sustainability Awareness

About This Module

Sustainability is an important issue in our society and our organisation is committed to practising sustainability in every area of our business.

This module has been designed to increase your awareness of sustainability, both at a personal and organisational level, and introduce you to practical steps you can take to minimise your environmental impact and live more sustainably.

This module has been divided into three units:

1. Sustainability Overview
2. Sustainability and Our Organisation
3. Actions that Support Sustainability

You should allow approximately 30 minutes to complete this module.

Waste Management

About This Module

Every year, residential and commercial establishments, including our organisation, generate significant amounts of waste. To protect the environment and our community, we must ensure that we manage waste responsibly.

This module has been developed to increase your understanding of effective waste management processes.

This module has been divided into three units:

1. Types of Waste
2. Managing Waste
3. Our Approach

You should allow approximately 35 minutes to complete this module.

Workplace Environmental Awareness (Video)

About This Module

In the modern workplace, an increase in the demand for manufactured goods means an increase in industrial activity which can have a significant impact on environmental waste and carbon footprints.

This module has been developed to help you understand the fundamentals of hazardous waste management, energy efficiency, sustainable water use and other practices that are essential for maintaining an environmentally friendly workplace.

As you proceed through the module, you must watch each video topic and answer the questions that follow.

You should allow approximately 30 minutes to complete this module.
