Siemens appoints new RSM

Siemens has expanded its sales team serving the UK and Ireland fire safety markets with the announcement of the appointment of Marios Malone.

Malone joins Siemens from global power management company Eaton where he worked as a Regional Sales Manager in the Fire Division. At Siemens he will be a Regional Sales Manager for the South, focusing on the company's Cerberus PRO open protocol fire protection system and its ASD (Aspirating Smoke Detection) range which uses red/blue optical technology to detect fire at the earliest incipient stage.

He brings more than 20 years of experience in the fire safety industry and is looking forward to the challenges his new role will bring. "Siemens has an excellent reputation in the fire safety arena, particularly in terms of its ongoing contribution to the digitalisation of systems. It is an interesting and exciting time to be involved as we move towards increasingly intelligent systems which are now realising the potential afforded by cloud-based solutions."

Rob Yates, Siemens Head of Building Products Fire Safety in the UK and Ireland, comments – "We are delighted to welcome Marios to the team. His appointment reflects the increased interest in and adoption of Siemens solutions in the UK and Ireland, particularly Cerberus PRO following the innovations brought about through the introduction of the IP8 version. I am sure Marios will make an important contribution in working with our network of partners to ensure we are offering effective protection for people and buildings based around a product portfolio focused on improving monitoring, maintenance and planning."

Siemens Smart Infrastructure (SI) is shaping the market for intelligent, adaptive infrastructure for today and the future. It addresses the pressing challenges of urbanization and climate change by connecting energy systems, buildings and industries. SI provides customers with a comprehensive end-to-end portfolio from a single source – with products, systems, solutions and services from the point of power generation all the way to consumption. With an increasingly digitalized ecosystem, it helps customers thrive and communities progress while contributing toward protecting the planet. Siemens Smart Infrastructure has its global headquarters in Zug, Switzerland. As of September 30, 2021, the business had around 70,400 employees worldwide.

Siemens AG (Berlin and Munich) is a technology company focused on industry, infrastructure, transport, and healthcare. From more resource-efficient factories, resilient supply chains, and smarter buildings and grids, to cleaner and more comfortable transportation as well as advanced healthcare, the company creates technology with purpose adding real value for customers. By combining the real and the digital worlds, Siemens empowers its customers to transform their industries and markets, helping them to transform the everyday for billions of people. Siemens also owns a majority stake in the publicly listed company Siemens Healthineers, a globally leading medical technology provider shaping the future of healthcare. In addition, Siemens holds a minority stake in Siemens Energy, a global leader in the transmission and generation of electrical power.

In fiscal 2021, which ended on September 30, 2021, the Siemens Group generated revenue of €6.2 billion and net income of €6.7 billion. As of September 30, 2021, the company had around 303,000 employees worldwide. Further information is available on the Internet at www.siemens.com.
